

Exchequer Dynamics Power To Report

IBM Powered

Reporting Systems

Time is of the essence in today's busy and competitive world, and so quick access to your business data for reporting is critical to business success.

- Expand Business Intelligence to new user populations with diverse needs.
- Gain agility and flexibility by enabling business users to find the information they need without repeated requests to the IT department.
- EDL will help your company gain greater analytical freedom, enabling faster decisions, lower IT costs and give the user new levels of understanding.

The Exchequer Dynamics Ex-Report software delivers intelligence to all areas of the business, from sales, marketing, customer service and finance, who will wonder how they ever managed without it.

Our business intelligence tools will help you reveal hidden patterns in tables of data.

Transform tables of data into a multidimensional pivot grid allowing quick sorts, filters, and layouts.

Slice, Dice, Roll-Up and Drilldown your data via mouse clicks, drags and drops.

Summarize data using rollups, without programming or spread sheet ranges.

Often overlooked is the infrastructure to power reporting and data analysis as a result reports are slow and tedious.

Not only is our software fast but we recommended IBM servers and Lenovo workstations for rock solid reliability and computer power.

Behind the IBM badge is the biggest global investment in R&D for server design and second to none systems support.

Exchequer Dynamics can provide the power to report and deliver all your Business Intelligence requirements.

- Expand Business Intelligence to new user populations with diverse needs.
- Gain agility and flexibility by enabling business users to find the information they need without repeated trips to the IT department.
- Gain greater analytical freedom -enabling faster decisions, lower IT costs and give the user new levels of understanding.
- No risk to data integrity.
- Guaranteed to help businesses find user data input errors.
